

Dean's Message

Eight years after the establishment of the Faculty and having seen the graduation of three classes of Pharmacy students, the Faculty of Pharmacy is responding to the aspirations of His Majesty King Abdullah II, and continues to move steadily towards excellence with its outstanding and qualified graduates thus equipping the Kingdom with the most professional pharmacists.

We at the Faculty of Pharmacy believe that pharmaceutical experts play a vital role in patient care, health outcomes, hospitals, community pharmacies, the pharmaceutical industry, making and marketing of medicine, academia and research. Thus, we are constantly striving towards enhancing and developing the academic, practical and scientific capabilities and

skills of its students.

To ensure success, the Faculty has been working diligently on strengthening the educational competencies of its faculty members through offering them grants to study at the world's finest universities in America, Britain, Canada, Australia and the European Union. Additionally, the Faculty endeavours to attract new competencies, expand its potential and constantly expand its educational resources.

Furthermore, the Faculty is developing the infrastructure of lecture halls, educational and research laboratories in order to accommodate the increasing number of students who choose Yarmouk University as a place to receive an education in Pharmacy with all that it represents of excellence and uniqueness at the academic and research level. In this academic year of 2020/2021, and with the distinguished efforts of its academic and administrative staff, the Faculty is conducting a self-study to fulfil the conditions and requirements of the American Accreditation Certificate for Pharmacy Programs.

In the field of scientific research, the Faculty of Pharmacy seeks to contribute to improving the fields of pharmaceutical, medical, drug delivery, clinical patient care, and treatment. The researchers at the Faculty have obtained a number of scientific research grants and formed local, regional and international research teams.

The Faculty of Pharmacy highly appreciates our students for their academic and cultural excellence and their participation in various curricular and extracurricular activities. We look forward to further achievements on both the local and international levels, and we look forward to keeping up with all the developments in the Pharmacy education field to evolve and upgrade our study plans according to these developments as well as for our graduates to play an active role in the Jordanian pharmaceutical field all over the Kingdom in both the private and public sectors.

May Allah preserve Jordan under the reign of His Majesty King Abdullah II, the patron of the march of science and scholars, and may this Faculty prosper under his leadership with the efforts of its instructors and students.
